CDNF Human E. coli

Product Data Sheet

Type: Recombinant
Source: E. coli
Species: Human
Other names: ARMET-Like Protein 1, ARMETL1, Conserved Dopamine Neurotrophic Factor, Cerebral Dopamine Neurotrophic Factor

Cat. No.:

RBG10103005	(5 µg)
RBG10103025	(25 µg)
RBG10103100	(100 µg)

Description

CDNF is a secreted neurotrophic factor that is expressed in brain, neuronal and certain non-neuronal tissues. It has been shown to promote survival, growth and function of dopamine specific neurons. CDNF and its structural homolog MANF, each contain an N-terminal saposin-like lipid binding domain, and a carboxyl-terminal domain, which is not homologous to previously characterized protein structures. CDNF and MANF can prevent 6-OHDA induced degeneration of dopaminergic neurons by triggering survival pathways in a rat experimental model of Parkinson disease.

Source

E. coli

Purity

98%

Biological Activity

Determined by its ability to stimulate the proliferation of rat C6 cells. The expected ED_{50} for this effect is 15-25 µg/ml.

Endotoxin

Endotoxin level is <0.1 ng/µg of protein (<1EU/µg).

Reconstitution

Centrifuge the vial prior to opening. Reconstitute in water to a concentration of 0.1-1.0 mg/ml. Do not vortex. For extended storage, it is recommended to further dilute in a buffer containing a carrier protein (example 0.1% BSA) and store in working aliquots at -20°C to -80°C

Storage, Stability/Shelf Life

-20°C
