

PRODUCT DATA SHEET

Procalcitonin Human, Rabbit Polyclonal Antibody

Cat. No.: RD181006100

Size: 0.1 mg

Source of Antigen: E. coli

Type: Polyclonal Antibody

Host: Rabbit

Isotype: IgG

Other Names:

PCT

Preparation:

The antibody was raised in rabbits by immunization with the recombinant Human Procalcitonin.

Amino Acid Sequence of Immunogen:

Recombinant Human Procalcitonin, total 126 AA. MW: 14 037 Da (calculated). UniProtKB acc.no. P01258. N-Terminal His-tag, 10 extra AA.

SLDSPRSKRC GNLSTCMLGT YTQDFNKFHT FPQTAIGVGA PGKKRDMSSD LERDHRPHVS
MPQNAN

Purification Method:

Immunoaffinity chromatography on a column with immobilized recombinant Human Procalcitonin.

Species Reactivity:

Human. Not yet tested in other species.

Antibody Content:

0.1 mg (determined by BCA method, BSA was used as a standard)

Formulation:

The antibody is lyophilized in 0.05 M phosphate buffer, 0.1 M NaCl, pH 7.2.

Reconstitution:

Add 0.2 ml of deionized water and let the lyophilized pellet dissolve completely. Slight turbidity may occur after reconstitution, which does not affect activity of the antibody. In this case clarify the solution by centrifugation.

Shipping:

At ambient temperature. Upon receipt, store the product at the temperature recommended below.

Storage/Stability:

The lyophilized antibody remains stable and fully active until the expiry date when stored at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles and store frozen at -80°C. Reconstituted antibody can be stored at 4°C for a limited period of time; it does not show decline in activity after one week at 4°C.

Quality Control:

Indirect ELISA – to determine titer of the antibody

SDS PAGE – to determine purity of the antibody

BCA - to determine quantity of the antibody

Applications:

ELISA

Note:

This product is for research use only.
