The RD191439100CS Human Matrix Metalloproteinase-9 (MMP-9)ELISA is a sandwich enzyme immunoassay for the quantitative measurement of human MMP-9. The kit measures total MMP-9 in serum and plasma (EDTA, heparin), saliva and urine. For professional use only. Users should have a thorough understanding of the Product Data Sheet prior to their use of this kit.

Kit Components:

A) Antibody Coated Microtiter Strips  
No hazardous ingredients.

B) Conjugate Solution  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet is not required according to actual EC/EU Regulations.

C) Master Standard  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet is not required according to actual EC/EU Regulations.

D) Dilution Buffer  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet is not required according to actual EC/EU Regulations. Contains material of animal origin. These materials should be handled as potentially infectious.

E) Wash Solution Conc. 10x  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet is not required according to actual EC/EU Regulations.

F) Substrate Solution  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet is not required according to actual EC/EU Regulations.

G) Stop Solution  
Not a hazardous mixture according to CLP Regulation (EC) as amended. Safety Data Sheet for this mixture according to actual EC/EU Regulations is attached.
