SECTION 4 FIRST AID MEASURES

4.1 General information:
Skin- and eye-contact causes irritation.
In case of indisposition contact a doctor, show this datasheet.

4.2 In case of skin contact:
Wash affected body parts with plenty amount of water.

4.3 In case of eye contact:
Wash the affected eye with water for a minimum of 10 minutes.
In case of indisposition contact an eye-specialist.

4.4 In case of ingestion:
Immediately wash your mouth with plenty of water.
Furthermore, swallow water in small amounts (dilution)

SECTION 5 FIRE-FIGHTING MEASURES

5.1 Extinguishing media:
Suitable extinguishing media:
Water, dry powder extinguisher, carbon dioxide

Extinguishing media which shall not be used for safety reasons:
Attention with dry powder extinguisher. It’s not appropriate for in door fire because raised foam causes lack of sight

5.2 Special exposure hazards arising from the substance or preparation itself, combustion products, resulting gases
In case of fire, despite flue gas also dangerous, product specific gases might be produced (phosphorus oxide). Because of the very low concentration of this mixture it is very unlikely that above mentioned oxides will be produced in a hazard amount. Further data are not known.
5.3 Special protective equipment for fire-fighters:
In case of heavy smoke a respirator shall be used.

SECTION 6 ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions:
In case of spilled mixture safety gloves have to be worn to prevent skin contact. In case of big amounts an additional inhalation protection is recommended.

6.2 Environmental precautions:
Mixture must not discard in sewage system/ residual waste. Dilute residues cautiously with water and clean it up with a paper towel.

6.3 Methods for cleaning up:
Spilled mixture can be cleaned up with paper towel and discarded in an appropriate waste. Afterwards clean bench with water.

SECTION 7 HANDLING AND STORAGE

7.1 Handling
Advice on safe handling:
Protective measures: wear protective clothing
Precautions against fire and explosion:
Development of explosive atmosphere is not possible

7.2 Storage
Technical measures and storage conditions:
Storage in well closed containers
Packaging materials:
Acid resistant containers (e.g.: glass, polyethylen) are suitable
Requirements for storage rooms and vessels:
Prevent direct sunlight and heat. Store in a well ventilated storage room.
Further information on storage conditions:
Storage temperature: 2°C to 8°C
Storage stability: stable
Maximal storage period: 2 years

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Exposure limit values:
Components with occupational exposure limits requiring monitoring: phosphoric acid
Maximum allowable concentration:
EU: Short term value (15 min): 2 mg/m³
     Long term value (8 h): 1 mg/m³
USA: Short term value (15 min): no data available
     Long term value (8 h): 1 mg/m³
8.2 Personal protection equipment:
  Respiratory protection: not necessary

SECTION 10 STABILITY AND REACTIVITY

Stable under mentioned storage conditions

10.1 Conditions to avoid:
  Direct sunlight, high temperature

10.2 Materials to avoid:
  Bases (cause heat development), powdery metals
  (heat development and dynamics of the reaction depends on the acid concentration)

10.3 Hazardous decomposition products:
  No data available.
  Because of the low acid concentration in the mixture, no hazardous gases are expected.
